Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

- A brief history of the invention was provided by Mr. Austin at the beginning of the interview.
- The differences between the prior art of record and the claimed invention were discussed, especially with regards to the arrangement of the struts relative to each other.
- The attorneys proposed amending the independent claims to include the limitation of the fixation plates being connected to each other by at least six substantially rigid, adjustable length struts, wherein each of the struts is disposed substantially diagonally with respect to its adjacent struts. It was argued that the Kalnberz reference fails to disclose a rigid strut that are disposed diagonally to each other.
- This proposed amendment appears to overcome the rejections under the Kalnberz reference.
- The amendment will be fully considered upon filing of the formal response to the Office action. In addition, an updated search of the prior art will also be performed.
- No indication of allowable subject matter was provided during the interview.
